

Patients' Opposition to Second-Trimester Abortions
at Madison Surgery Center

A Letter to my Doctor, the Madison Surgery Center, Meriter Hospital, University of Wisconsin Hospital, and UW Medical Foundation:

I strongly object to the UW's and Meriter's decision to open a full-scale, late second-trimester abortion practice within the Madison Surgery Center.

I cannot receive care in the same office where every year over 100 babies who are 20-weeks-old are executed, and when UW doctors have previously experimented on brains and pancreases from such babies. I also do not want my care providers to have to work in a second-trimester abortion facility against their objections.

Therefore, I am informing you now that I refuse to be scheduled at the Madison Surgery Center for any surgery that I may need. Instead, I ask that those surgeries occur at another facility. In addition, I will now seriously consider whether or not I can switch insurance coverage away from the UW and Meriter.

Please stop performing second trimester abortions.

Sincerely,
